

TIP OF THE WEEK # 59

Noise Reduction

AUBMC Staff should be aware of the noise pollution problem and its effect on the comfort of patients. The main sources of noise at the AUBMC are:

- **Loud voices of employees, patients and visitors talking to each other in the hallway or on the phone**
- **Cellular phone rings, pagers and intercoms**
- **Equipment and carts used by X-ray, Dietary, Housekeeping, Linen, Plant Engineering etc**
- **Opening and closing doors**
- **Walking with high heels/hard heel shoes that are loud**

Let us all do our best to reduce the noise level in the Medical Center.

More details can be found in the AUBMC Noise Reduction Policy (GLD-MUL-001) thru the following link:

https://his.aub.edu.lb/accrm/policies/AUBMC_Noise%20Reduction_040707_2nd_Ed..pdf
