

TIP OF THE WEEK # 76

Medical Ethics

Ethical issues are handled in a multidisciplinary manner where the medical, nursing, and other health professional staff participate in resolving immediate social, cultural, religious, and other ethical needs. Unresolved ethical issues are referred to the Bioethics Committee.

When faced with ethical issues, physicians should refer to the Bylaws and Rules and Regulations of the Medical Staff at the AUBMC. In addition, the Chief of Staff's Office will assist in interpreting the Lebanese Law No. 288 on "Medical Ethics".
