Return the completed questionnaire to:

Accreditation & Risk Management Office,
AUBMC Phase I, 8th Floor, Rooms C-801 & C-802
Deadline: December 31, 2009

Employee name:  
Title:  
Department:  
Id number:  
Date:  

Complete the statements using the following words:

- Abduction
- Identification badges
- Elderly
- Immunity
- Electrolytes
- Needles
- Hand hygiene
- Pre-operative verification
- Identification
- Skin marking

1. A **pre-operative verification** shall be done prior to any operation or high-risk procedure as per the policy COP-MUL-003.

2. **Needles** shall not be recapped or bent before disposal in sharps containers.

3. Proper patient **identification** using two patient identifiers shall be performed before medication administration.

4. All children at AUBMC shall not be left unattended as this helps prevent **abduction**.

5. Concentrated **electrolytes** shall not be left on the patient units, and shall be available exclusively in the Pharmacy Department.

6. **Skin marking** is performed prior to operations involving laterality in order to prevent wrong site surgery.

7. All AUBMC employees are required to wear their **identification badges** at all times while on AUBMC premises.

8. Vaccines are provided for AUBMC staff to ensure they have proper **immunity**.

9. Vulnerable patient populations identified in the policy COP-MUL-016 include neonates, children, and the **elderly**.

10. **Hand hygiene** is the most important procedure to prevent the transmission of infections, and should be done before and after every patient encounter.

**BONUS QUESTION:** Describe a safety issue in your area and win an additional gift:
